## Project Design Phase-II Technology Stack (Architecture & Stack)

Date	16 October 2022	
Team ID	PNT2022TMID20376	
Project Name	Personal Expense Tracker Application	
Maximum Marks	4 Marks	

## **Technical Architecture:**

The Deliverable shall include the architectural diagram as below and the information as per the table 1 & table 2

**Table-1: Components & Technologies:** 

S.No.	Component	Description	Technology
1.	User Interface	The user can Interact with the	HTML, CSS, JavaScript /
		application with use of Chatbot	Angular Js / React Js etc.
2.	Application Logic-1	The application contains the sign	Java / Python
		in/sign up where the user will login	
		into the main dashboard	
3.	Application Logic-2	Dashboard contains the fields like	IBM Watson STT service
		Add income, Add Expenses, Save	
		Money	
4.	Application Logic-3	The user will get the expense	IBM Watson
		report in the graph form and also	Assistant,SendGrid
		get alerts if the expense limit	
		exceeds	11 001 11 001
5.	Database	The Income and Expense data are	MySQL, NoSQL, etc.
		stored in the MySQL database	
6.	Cloud Database	With use of Database Service on	IBM DB2, IBM Cloudant
		Cloud, the User data are stored in	etc.
		a well secured Manner	
7.	File Storage	IBM Block Storage used to store	IBM Block Storage or Other
		the Financial data of the user	Storage Service or Local
			Filesystem

**Table-2: Application Characteristics:** 

S.No.	Characteristics	Description	Technology
1.	Open-Source Frameworks	Flask Framework in Python is	Python-Flask
		used to implement this Application	
2.	Security Implementations	This Application Provides high	Container Registry,
		security to the user Financial data.	Kubernetes Cluster
		It can be done by using the	
		Container Registry in IBM cloud	
3.	Scalable Architecture	Expense Tracker is a life time	Container Registry,
		access supplication. It's demand	Kubernetes Cluster
		will increase when the user's	
		income are high	
4.	Availability	This application will be available to	Container Registry,
		the user at any part of time	Kubernetes Cluster
5.	Performance	The performance will be high	
		because there will be no network	Kubernetes Cluster
		traffics in the application
